

GCSE Geography Revision Overview

Exam dates: SDME 22 May 2017 pm, Key Themes 6 June 2017 pm

- All of the lesson resources as well as digital versions of the revision guide are available on google classroom – this is a fantastic resource and is a good start point. The class code is 7w81mg.
- Use your SDME revision booklet to revise for your SDME but you should spend much more time revising for the Key Themes paper.
- The Key Themes exam is worth 50% of the final grade. Use the revision guide to review the different topics, then complete the exam questions on the topic you have just revised. Use the cards to revise the case studies –make sure you know them all.
- Should you wish to purchase a revision guide we recommend www.cgpbooks.co.uk and make sure you buy the guides for **OCR GCSE B Geography**.
- There is also GCSE Pod which is good for key terms and some of the processes but it doesn't cover everything.

Use the checklist below as an overview of what you need to revise.

Rivers and Coasts – Key themes examination	Revised Y/N
Hydrological cycle and drainage basins	
Causes, effects and responses to flooding (Somerset and Bangladesh)	
River landforms and processes (River Parrett)
