

Huish Sixth Course Selection Information 2017/2019

As an Academy we are fully committed to ensuring that every learner is inspired, supported and challenged to be better than they ever thought they could be. This applies equally to academic achievement and the development of 'softer' skills such as leadership, punctuality and communication, which are important whether your intention is to continue in education or to take up employment.

Underpinning this aim is our belief that we will have very high expectations of what you can achieve, provide fantastic support and foster a love of learning that will serve you well throughout your life.

The curriculum that you follow is critical to ensuring that you maximise your potential and are able to make the most of the opportunities presented. All staff at the Academy appreciate that every student is an individual with their own talents, interests and aspirations. We offer a range of A level and vocational qualifications to meet these aspirations. Our curriculum offer is organised into three broad pathways which have been designed to provide the best possible choice of qualifications based on differing aspirations and destinations. We believe that this pathway model, tailored to your needs, with a range of dynamic courses delivered in an exciting and compelling fashion and supported by a first class extra-curricular offer, will offer you the best chance of success.

Key to this success is making informed choices, we will fully support you through this process and our open evening is just the first of many opportunities to discuss your future at Huish Sixth.

Our qualifications are broadly arranged into three categories:

1. **Facilitating A levels** – these subjects are recognised by the Russell Group and other leading universities as being the foundation blocks needed to pursue an academic undergraduate course. If you aspire to study at such a university then it is recommended that you select at least two of these subjects.
2. **Other A levels** – studying a combination of these subjects will enable you to apply to university, a higher level apprenticeship or employment.
3. **Vocational courses** – studying a combination of these courses is perfect preparation for applying for a higher education programme in a vocational area, higher level apprenticeship or employment.

Facilitating A levels	Other A levels	Vocational courses
