* Attainment 8 is a measure of a pupil's average grade across a set suite of eight subjects. Grades are measured on a 1-9 point score scale.

** Progress 8 measures the progress of pupils across a selected set of 8 subjects. It is a type of value added measure, meaning that pupils' results (Attainment 8) are compared to the actual achievements of other pupils with the same prior attainment. A score of 0.5 would mean that students achieved on average a half of a grade better per subject than other pupils nationally with the same prior attainment at KS2.

*These figures compare the attainment of students in this school or college with the average attainment of students in the same local authority and across England who studied for the same qualifications. This measure factors in completion of qualifications as well as attainment. If a student doesn't complete a qualification, this is treated as a fail in the measure. The score for the school and Local authority is expressed as a proportion of a grade above or below the England average. The England score is always 0.

**Facilitating A levels are ones that are commonly needed for entry to

leading universities. They are: Biology, Chemistry, Physics, Mathematics, Further Mathematics, Geography, History, English Literature and Classical or Modern Languages.
